Meet...Meet

Harter introduces Meet, an elegant, sophisticated new swivel chair. Designed by John Kaloustian, Meet revisits classic, modern forms with a contemporary twist. Meet's four arm styles (box, upholstered pad on metal, soft pad on metal and urethane), two base options (metal or rugged composite) plus the swivel and knee tilt options provide lots of custom capabilities.

Combine Meet's options with Harter's wide selection of upholstery materials to create different looks for different occasions. Choose Spinneybeck leathers to upholster Meet for an executive suite, a high-level conference room, a hotel room, or an airport conference center. Or choose from among Harter Textiles for a lower key, more flexible solution for team conferencing, hot-desking or guest officing.

Since 1927, Harter customers have depended on us for long-lasting, high quality products and personal service without parallel. Today's new Harter honors those expectations, partnering with designers and their clients to develop creative design solutions based on classic modern forms and a fresh palette of materials, colors, textiles and surfaces. Harter. Always at the heart of the solution.
