### **Give Shape to Your Best Ideas with Harter's Versatile New Tables**

*New York, NY*—Harter takes its portfolio of products for the work/life universe to new heights with the exciting Shapes Collection of all-purpose tables for elegant solutions.

Designed by Timothy deFiebre to complement the entire range of Harter seating furniture, the new Shapes tables come in both desk and café height for ultimate flexibility in workplace and hospitality installations.

**Shapes tables provide an inspiring range of top, edge, and base options, so you can create unique “custom” solutions precisely tailored to the needs of your contract clients.** Desk-height tabletops (29”) come in rounds, squares, rectangles, racetracks and ovals in dimensions from 24” to 96”, depending on the shape. The 42” café-height tables may be specified with 24”, 30”, or 36” round or square tops to fit virtually any space. And with list prices starting at \$650, Shapes tables are reasonably priced.

**For top surfaces and edges, choose from an unprecedented selection of materials, with colors to suit every mood from the formally elegant to the sportif.** You’ll find stylish new Harter laminates, Harter stains on beech veneer, environment-friendly ApplePly--and now, sophisticated Vanceva glass and “green” linoleum, materials not commonly available to contract customers. Let your imagination soar!

**Shapes tops may be combined with three base styles: The sleek laser-cut round base, graceful x-base, or sculpted dome base with decorative cap.** All are available in standard Harter frame finishes, including mirrored or brushed metallics, plus powder-coat darks of exceptional richness.

**Since 1927, Harter [♥] customers have depended on us for long-lasting, high quality products and personal service without parallel.** Today’s new Harter honors those expectations, partnering with designers and their clients to develop creative design solutions based on classic modern forms and a fresh palette of materials, colors, textiles, and surfaces. **Harter [♥]. Always at the heart of the solution.**
